Alta™ + Moisture Barrier	\$325.00	\$6.00	\$5.50
Alta™ + Antimicrobial + Moisture Barrier	\$325.00	\$6.50	\$6.00
Acrylic Backing Only	\$325.00	\$4.00	\$3.90
Moisture Barrier Only	\$325.00	\$4.90	\$4.80

Please request a quotation for 1,000+ yards to requests@paulbraytondesigns.com or call 336-882-5200.

ALTA™ TREATMENTS & PROCESSING TECHNOLOGY

Alta™ is the first and only technology engineered to deliver the exact protection needed for specific fabric uses and environments. The single or combined application of one of the following treatments will allow your fabrics to meet the specifications required in settings such as residential, healthcare, institutional, corporate, hospitality, entertainment and food services.

Alta Moisture Barrier

Alta™ Moisture Barrier is a lightweight, breathable film barrier that is laminated to the back of fabrics to prevent liquids from being pushed through the fabric weave, therefore avoiding any contamination of the cushion beneath it. Coupled with Alta™ Spill & Stain Repellent, we would suggest using liquid barriers for food and beverage areas, healthcare and senior living environments.

Alta Spill & Stain Repellent

Alta™ Spill & Stain Repellent provides a permanent and unmatched repellency to oil and water-based stains caused for example by coffee, soda, wine, mustard and salad dressing. Liquids bead up on the fabric's surface, therefore facilitating the cleaning process.

Alta Antimicrobial

Alta™ Antimicrobial reduces odors and risks of stains caused by microorganisms including bacteria, fungi and algae, thus avoiding degradation of the fabric. This technology can achieve more than 99.9% of bacterial reduction. The Alta™ antimicrobial technology has been tested to over 75 healthcare launderings with a 99.5% efficacy rate.

Please note: Minimum order quantity of 10 yards.
Presently we cannot treat vinyl, polyurethane, or leather with Alta.
